## MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2024

---

### Forward-Looking Statements (“FLS”)

The Management Report of Fund Performance may contain forward-looking statements. FLS means disclosure regarding possible events, conditions or results of operations that is based on assumptions about future economic conditions and courses of action, and includes any future-oriented financial information (“FOFI”) with respect to prospective results of operations, financial position or cash flows that is presented either as a forecast or a projection. FOFI is FLS about prospective results of operations, financial position or cash flows, based on assumptions about future economic conditions and courses of action.

FLS can be identified by the use of forward-looking terminology such as “may”, “will”, “should”, “expect”, “anticipate”, “target”, “project”, “estimate”, “intend”, “continue” or “believe”, or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of one of the Fund may differ materially from those reflected or contemplated in such forward-looking information and statements. Material risk factors that could affect actual results are identified under the heading “What are the Risks of Investing in the Fund?” in the Fund’s Simplified Prospectus. Investors are also cautioned that FLS is based on a number of factors and assumptions, including the Fund’s current plans, estimates, opinions and analysis made in light of its experience, current conditions and expectations of future developments, as well as other relevant factors. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith but without legal responsibility.

This Management Report of Fund Performance represents the portfolio management team’s view of the significant factors and developments affecting the investment fund’s performance and outlook for the year ended December 31, 2024. Every effort has been made to ensure the information contained in this Management Report of Fund Performance is accurate and complete, however, the investment fund cannot guarantee the accuracy or the completeness of this material. For more information, please refer to the Fund’s Simplified Prospectus (“Prospectus”) and the audited financial statements. In this report, “Manager”, refers to NewGen Asset Management Limited, the Manager of the Fund. The “Fund” refers to the NewGen Focused Alpha Fund. In addition, “net asset value” or “NAV” refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based. All dollar figures are reported in Canadian dollars or in thousands of Canadian dollars, unless otherwise indicated.

### Investment Objective and Strategies

The Fund’s principal investment objective is to provide investors with long-term capital gains. In order to achieve its investment objective, the Fund intends to invest in a concentrated portfolio of high-quality equities predominantly listed in Canada. The Fund may use leverage. The leverage will be created through the use of cash borrowings, short sales and derivative contracts. The aggregate gross exposure of the Fund shall not exceed the limits on the use of leverage permitted under applicable securities legislation.

The Fund primarily invests long, but it may also opportunistically short equities that offer the potential to generate outsized returns and to offset market risk. The Fund will hold a portfolio of approximately 25 core equity positions. Portfolio construction will rely on in-depth fundamental analysis with the aim of identifying attractive equity opportunities in the Canadian investment universe. It may also invest up to 20% of its NAV in securities of listed in the U.S. equities or in U.S. issuers when compelling risk-reward opportunities arise. Positions will be weighted in the portfolio relative to their estimated potential return as estimated by the Manager, as well as the securities’ underlying liquidity and risk profiles.

# NEWGEN FOCUSED ALPHA FUND

## MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2024

---

### Risk

The risks associated with investing in the Fund remain as discussed in the Prospectus. The Fund is suitable for someone who is looking for steady long-term capital appreciation and a stable stream of income in a diversified portfolio of investments to hold as part of their balanced portfolio and has a medium to longer term investment horizon.

There were no significant changes to the investment objectives and strategies that affected the Fund's overall level of risk during the reporting year.

### *Terrorism, War, Natural Disaster and Epidemic Risk*

Terrorism, war, military confrontations and related geopolitical events (and their aftermath) can lead to increased short-term market volatility and may have adverse long-term effects on U.S. and world economies and markets generally. Likewise, natural and environmental disasters, such as, for example, earthquakes, fires, floods, hurricanes, tsunamis and weather-related phenomena generally, as well as wide-spread disease and virus epidemics, can be highly disruptive to economies and markets into the medium term, adversely affecting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors impacting the value of the Funds' investments.

## MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2024

---

### Results of Operations

During the ended December 31, 2024, Class C units returned 30.33%, Class F units returned 29.93 %, Class G units returned 29.09 % and Class I units returned 38.22%, after fees. By comparison, the S&P/TSX Composite Index was up 21.65% on a total return basis. It is important to note that the Fund's return reflects the effect of fees and expenses for professional management and it comprises both long and short positions, while the S&P/TSX Composite Index does not have such costs and is fully invested.

Class F USD has been offered for less than one year, the return for this Class is not provided.

The net asset value (NAV) of the Fund increased by \$23.4 million to \$71.2 million from December 31, 2023 to December 31, 2024, with the main changes to equity derived through a combination of \$10.7 million in net inflows, \$3.8 million in distributions and \$16.5 million in net gain.

2024 was marked by strong equity performance across major indices. U.S. equities delivered back-to-back double-digit returns, while the S&P/TSX Composite Index closed the year up 18%, marking its highest annual return in the past three years. Throughout the year, market sentiment oscillated between concerns over consumer resilience, persistently elevated interest rates, geopolitical uncertainty, and the U.S. presidential election—before ultimately shifting toward a more bullish outlook, driven by expectations of a lower interest rate trajectory, the strength of the U.S. economy, a surge in artificial intelligence-related investments, and optimism surrounding potential tax and regulatory relief.

Market volatility remained elevated as investors reacted to rapidly changing economic data and shifting macroeconomic narratives. Intraday market movements were heavily influenced by economic indicators, reinforcing the sensitivity of investors to inflation prints, labor market trends, and central bank policy signals.

Equity market breadth remained narrow, with a select group of large-cap technology companies significantly outperforming small- and mid-cap stocks. This trend underscored the growing concentration of gains within a handful of companies benefiting from the AI-driven investment cycle.

In commodities, gold was a standout performer, rising 27% for the year, coming just shy of its all-time high reached in October 2024. Energy and copper markets saw more subdued performance, with gains of 2% and 3%, respectively, reflecting a more tempered global growth outlook. Meanwhile, Bitcoin's resurgence was particularly notable, posting an impressive +124% return—marking its second consecutive year of triple-digit gains, fueled by increasing institutional adoption and optimism surrounding digital assets.

Sector-wise, the TSX's strong performance was led by Technology (+38%), Financials (+25%), and Materials (+19%), benefiting from robust earnings growth and favorable macro conditions. On the other hand, Communication Services (-27%) was the sole sector to post negative returns, reflecting structural headwinds and sector-specific challenges.

During the year ended December 31, 2024, the Fund did not breach the aggregate gross exposure limit of 300% of the Fund's NAV as prescribed by securities legislation, while the Fund's aggregate gross exposure ranged from 108.6% to 180.7% of the Fund's NAV during such period of time. As of December 31, 2024, the Fund's aggregate gross exposure was 137.1%. The primary source of leverage was short positions in equity securities.

### Recent Developments

As we enter 2025, equity markets continue to be supported by renewed investor confidence following the U.S. election. However, risks remain, including geopolitical instability, potential policy shifts, and the uncertain impact of proposed tariffs on global trade flows.

A key question for markets will be the resilience of global economies in the face of elevated interest rates. The coming months will serve as a stress test for economic durability, particularly as investors evaluate whether central banks have achieved a soft landing or if further policy adjustments will be required.

# NEWGEN FOCUSED ALPHA FUND

## MANAGEMENT REPORT OF FUND PERFORMANCE

### Financial Highlights – December 31, 2024

Additionally, U.S. equity valuations remain elevated, prompting investors to explore alternative opportunities. Global equities, particularly those in emerging markets, as well as defensive assets such as gold, have seen increased inflows as investors seek to hedge against potential market turbulence. Notably, gold reached new all-time highs in early 2025, reinforcing its status as a preferred safe-haven asset amid ongoing uncertainty.

Artificial intelligence remains a dominant structural investment theme, but questions surrounding its capital intensity, energy consumption, and long-term monetization remain top of mind for investors.

From a regional perspective, the Canadian market presents attractive opportunities, given its significant exposure to commodities, competitive earnings yields, and a valuation discount relative to U.S. equities. This combination positions Canada as a compelling market for investors seeking exposure to real assets and cyclical growth at more reasonable valuations.

Looking ahead, we remain focused on identifying high-conviction investment opportunities within the current market environment, balancing risk and reward in a landscape characterized by rapid technological shifts, shifting policy dynamics, and evolving macroeconomic conditions.

### Related Party Transactions

#### Management fees:

As a result of providing investment and management services, the Manager receives a management fee calculated and accrued daily based on the NAV of the class of units of the Fund, plus applicable taxes, payable on the last day of each calendar month. For the year ended December 31, 2024, the Fund incurred management fees of \$493,274 plus applicable taxes. Management fees, if any, in respect of Class I units are direct fees negotiated with the investor.

The Manager uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as general administrative expenses relating to the Manager's role as Manager.

The following is a breakdown:

Class of Units	Annual Rates	As a Percent age of Management Fees	
		Dealer Compensation	General Administration and Investment Advice
Class C units	0.75%	0.0%	100.0%
Class F units	1.00%	0.0%	100.0%
Class F USD units	1.00%	0.0%	100.0%
Class G units	2.00%	50.0%	50.0%
Class G USD units	2.00%	50.0%	50.0%
Class I units	Negotiable*	0.0%	100.0%

\*Negotiated by the investor and paid directly by the investor. The management fee rate would not exceed the management fee payable on Class G units of the Fund.

# NEWGEN FOCUSED ALPHA FUND

## MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2024

---

### Performance fees:

The Manager receives a performance fee in respect of each class of units of the Fund. The Fund will pay the Manager a performance fee each calendar quarter (a “Performance Fee Determination Period”) equal to 15% of the Net Profit (as defined below) of each applicable class of units subject to the High Watermark (as defined below). The performance fee will be calculated and accrued for each class on a daily basis during each Performance Fee Determination Period and, with respect to an intra-quarter redemption of units of a class, on the relevant redemption date. For the year ended December 31, 2024, the total performance fees incurred were \$3,138,694.

Net Profit means, in respect of any class of units of the Fund for any Valuation Day, the positive amount (if any) calculated by deducting the NAV per unit of the class for that Valuation Day from the highest NAV per unit in respect of which a performance fee liability has previously arisen (the “High Watermark”) (or the initial offering price of the units if no performance fee liability has previously arisen in respect of such class of units). The performance fee will be determined by multiplying the amount of Net Profit by the total number of the units of such class outstanding at the close of business on such Valuation Day.

No performance fee shall be paid in respect of a class unless the class NAV per unit exceeds the High Watermark and, in such circumstances, a performance fee shall only be paid on that portion of the Net Profit that exceeds the High Watermark.

Investors in Class I units may negotiate a performance fee to be paid by the investor that is different than the one described above or no performance fee at all.

#### Notes:

- (1) This information is derived from the Fund's financial statements for December 31, 2024, December 31, 2023, December 31, 2022 and December 31, 2021 and is not a reconciliation of beginning and ending net assets per unit.
- (2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/(decrease) from operations is based on the weighted average number of units outstanding over the financial year.
- (3) Distributions were paid in cash or automatically reinvested in additional units of the Fund, or both.
- (4) This information is provided as at December 31, 2024, 2023, 2022 and 2021 of the years shown as applicable.
- (5) Management expense ratio is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average NAV during the year.
- (6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average NAV during the year.
- (7) The Fund's portfolio turnover rate indicates how actively the Fund's advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the units in its portfolio once in the course of the period. The higher a funds' portfolio turnover rate in the period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

# NEWGEN FOCUSED ALPHA FUND

## MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2024

### Past performance of the Fund

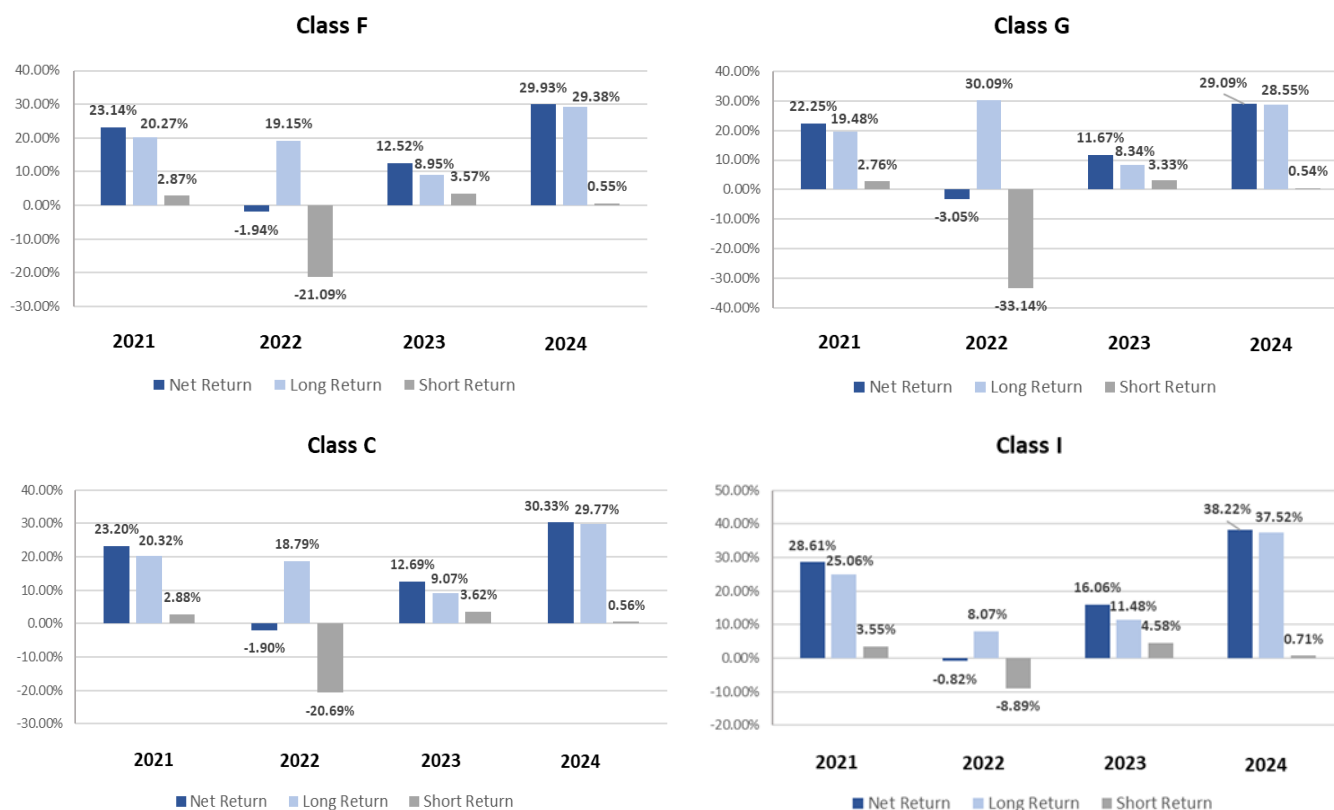

The following bar charts present the performance of each class of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each period, or on the class inception date, as applicable, would have increased or decreased by the last day of the period presented. The following information shown assumes that all distributions made by the Fund in the period shown were reinvested in additional securities of the investment fund and does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. As required under applicable securities regulation, the return of the Fund's long and short portfolio positions are shown for each class in addition to the overall total return for each such class.

How the investment fund has performed in the past does not necessarily indicate how it will perform in the future.

### Year-by-Year Returns

The following bar charts show the Fund's annual performance for each of the units classes shown, as applicable, and illustrates how the Fund's performance has changed from year to year. The bar chart shows, in percentage terms, how much an investment in Class C, F, G and I units, respectively, made on the first day of each financial year would have grown or decreased by the last day of the financial year.

The annual returns for the year ended December 31, 2024, 2023, 2022 and 2021 are as follows:

### Note:

The inception date for Class F, Class G, Class C and Class I units is January 29, 2021. The actual trading for the fund commenced on March 30, 2021.

The inception date for Class F USD and Class G USD is February 15, 2024. The actual trading for Class F USD commenced on December 18, 2024. The performance for Class F USD is not provided since this Class has been less than a year in operation.

There was no trading for Class G USD during the period.

## MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2024

### Annual Compound Returns

The table below shows the annual compound returns for each of applicable periods ended December 31, for each Class of the Fund and the respective long and short portfolio positions as compared to the S&P/TSX Composite Index.

The S&P/TSX Composite Index is a capitalization-weighted index that tracks the performance of about 250 largest and most prominent companies listed on Canada's largest stock exchange, the Toronto Stock Exchange (TSX). It is the equivalent of the S&P 500 market index in the United States.

<b>Compound Returns</b>
