

FUND OVERVIEW

The NewGen Equity Long-Short LP Class F Fund (NGLS) seeks to balance steady risk-adjusted performance with capital preservation, in order to deliver a unique return stream that can provide real diversification benefits. The NGLS aims to achieve this by targeting persistent structural inefficiencies that exist in the equity markets and are particularly prevalent in Canada. In order to minimize downside volatility, the Fund adheres to disciplined risk management targets, with a highly liquid portfolio and defensive exposures (market and sector). The Fund's active management style is based on an investment process that merges both trading and fundamental analysis and sources Alpha (excess return) from stock-specific ideas with catalysts (i.e. corporate updates, financings, index addition/deletions, clean-ups/blocks, strategic reviews, M&A, etc) over a short and medium-term time horizon. The portfolio is typically concentrated around 40-60 positions that are balanced between both longs and shorts. Through this portfolio composition, net exposures generally range from 20-40%, thereby minimizing Beta (systematic risk).
